

### Remarks

A paper and a computer readable form of a substitute sequence listing accompany this response. It is believed the contents of the two forms are identical. The contents of the substitute sequence listing are identical to the sequence listing filed with the application except for the explanation of the source of the genetic material as required by 37 C.F.R. § 1.823(b).

The substitute sequence listing adds no new matter to the application.

Date: 19 April 2004

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'J. M. Skerpon', written over a horizontal line.
